## Projects

### Aula

Aula is an interactive online quiz and learning platform built with Next.js, Node.js, and Firebase. It features multiple question formats, real-time progress tracking, and anti-cheating measures like focus detection and timed assessments.

### Cord.AI

AI-powered ESG & carbon reporting automation. Automates carbon emissions tracking and ESG compliance for businesses using FastAPI, Supabase, and React. Handles structured/unstructured data (CSVs, PDFs) for seamless reporting aligned with CSRD and EU taxonomy standards.

### Manjari

Manjari is a progressive web app which aims to provide language education to anyone in a gamified way. U might be total beginner to the path of language learning but this platform will help u advance to new heights of communication.
